INDEX TO VOLUME 61, 1967

A

About Our Authors, 40, 81, 145, 195, 343, 379.

Achromatic Doublet, Making an Eight-Inch (R.A.S.C. Papers), *Roy Quade*, 381.

Advances in Astronomy, 43, 86, 146, 196, 380.

47 Andromedae, A Study of the Spectrographic Binary, *J. Murray Fletcher*, 56.

Apparent Visual Magnitudes of the Brightest Stars in Globular Clusters, *Sidney van den Bergh*, 179.

Astronomy at the David Dunlap Observatory, 1935–1967, *John F. Heard* and *Helen Sawyer Hogg*, 257.

Astronomy in Canada, *K. O. Wright*, 211.

Astronomy of Time and Position, *Malcolm M. Thomson*, 226.

Award of the Leonard Medal to Dr. C. S. Beals, *Peter M. Millman*, 53.

B

Barnes, Thomas, Nova Delphini 1967 (with Sidney van den Bergh, Gretchen Hagen, Peter Jackson, René Racine, Nancy Remage and Vicki Watt), 339.

Barrington, R. E. (see Review of Publications).

Batten, Alan H., Of Stars and the Galaxy, 241 (see also Review of Publications and Notes from Observatories).

Beals, C. S., Award of the Leonard Medal to, *Peter M. Millman*, 53.

Beals, C. S., Impact Craters of the Earth and Moon (with Ian Halliday), 295.

Bergh, Sidney van den, Fossil H II Regions, 23; Apparent Visual Magnitudes of the Brightest Stars in Globular Clusters, 179 (see also Review of Publications).

Beta Cephei Stars, The, *John R. Percy*, 117.

Binary 47 Andromedae, A Study of the Spectrographic, *J. Murray Fletcher*, 56.

Bright Fireball Observed Photographically, by Radar and Visually, A, *F. R. Park* and *B. A. McIntosh*, 25.

C

Canadian Radio Astronomers Record Success, 196.

Chamberlain, Von Del, The Fireball of December 9, 1965—Part I (with David J. Krauze), 184, 390.

Chant, C. A., The Growth of the R.A.S.C. and its Guiding Mentor, *Ruth J. Northcott*, 218.

Cosmological Problems I, The Time Scale, *R. C. Roeder*, 369.

Covington, A. E., The Development of Solar Microwave Radio Astronomy in Canada, 314 (see also Review of Publications).

Crater, Summary of Drilling at the West Hawk Lake, *Ian Halliday* and *A. A. Griffin*, 1.

Craters of the Earth and Moon, Impact, *C. S. Beals* and *Ian Halliday*, 295.

SS Cygni, 155.

D

David Dunlap Observatory, Astronomy at the D.D.O., 1935–1967, *John F. Heard* and *Helen Sawyer Hogg*, 257; Notes, 47, 198; Communications, *van den Bergh*, no. 150, 23; no. 160, 179; *Percy*, no. 162, 117; *Fernie*, no 156, 127; *Barnes et al.*, no. 165, 339; *Roeder*, no. 170, 369.

Development of Solar Microwave Radio Astronomy in Canada, The, *A. E. Covington*, 314.

Dominion Astrophysical Observatory, Of Stars and the Galaxy, *Alan H. Batten*, 241; Notes, 93, 345; Contributions, No. 113, *Fletcher*, 56.

Dominion Observatory, Astronomy of Time and Position, *Malcolm M. Thomson*, 226; Notes, 385; Contributions, Vol. 4, No. 25, *Halliday* and *Griffin*, 1.

Douglas, A. Vibert, Georges Lemaître, 1894–1966, 77; Interim Report on Commission 41, I.A.U., 193 (see also Review of Publications).
Douglas, J. A. V., The Fireball of April 25, 1966, I, Canadian Visual Observations (with B. A. McIntosh), 159.

E

Erratum, 390.
Evans, W. F. J. (see R.A.S.C. Papers).

F

"Fata Morgana" in the Canadian Winter, An Observation of the, *Ian Halliday*, 74.
Fernie, J. D., Journey via Otjiwarongo, 127.
Fireball Observed Photographically, by Radar and Visually, A Bright, *F. R. Park* and *B. A. McIntosh*, 25.
Fireball of April 25, 1966, I, Canadian Visual Observations, The, *B. A. McIntosh* and *J. A. V. Douglas*, 159.
Fireball of June 14, 1967, Path of the, *Bruce A. McIntosh*, 191.
Fireball of December 9, 1965, The—Part I, *Von Del Chamberlain* and *David J. Krauze*, 184, 390.
Fletcher, J. Murray, A Study of the Spectrographic Binary 47 Andromedae, 56.
Fogle, Benson, Recent Advances in the Research on Noctilucent Clouds, 64.
Fossil H II Regions, *Sidney van den Bergh*, 23.

G

Gaizauskas, V. (see Review of Publications).
Galactic Interior, A Note on the Radial Motion of Neutral Hydrogen in the, *K. A. Innanen*, 141.
U Geminorum-Type Variables During 1966, Notes on, 155.
Gold Medal of the Society, 1966 (*Sherwood*), 100; 1967 (*Chambers*), 388.
Green, Norman (see Review of Publications).
Grey, Mary W. (see Notes from Observatories).
Griffin, A. A., Summary of Drilling at the West Hawk Lake Crater (with Ian Halliday), 1.
Growth of the R.A.S.C. and its Guiding Mentor C. A. Chant, The, *Ruth J. Northcott*, 218.

H

Halliday, Ian, Summary of Drilling at the West Hawk Lake Crater (with A. A. Griffin), 1; An Observation of the "Fata Morgana" in the Canadian Winter, 74; Impact Craters of the Earth and Moon (with C. S. Beals), 295 (see also Advances in Astronomy and Review of Publications).
Hartz, T. R. (see Review of Publications).
Heard, John F., Astronomy at the David Dunlap Observatory, 1935–1967 (with Helen Sawyer Hogg), 257.
High Altitude Balloon Experiments to Study Oxygen in a Planetary Atmosphere (R.A.S.C. Papers), W. *F. J. Evans*, *A. Vallance Jones* and *E. J. Llewellyn*, 82.
Hogg, Helen Sawyer, Some Contributions of R. M. Petrie to the Study of Groups of Stars (Memorial Lecture), 105; Astronomy at the David Dunlap Observatory, 1935–1967 (with John F. Heard), 257.
H II Regions, Fossil, *Sidney van den* Bergh, 23.

I

I.A.U., Interim Report on Commission 41, *A. Vibert Douglas*, 193.
I.A.U., The XIII General Assembly of the, 391.
I.G.C. (1966) Visual Meteor Program, The—Progress Report No. 12, 151.
Impact Craters of the Earth and Moon, *C. S. Beals* and *Ian Halliday*, 295.
Innanen, K. A., A Note on the Radial Motion of Neutral Hydrogen in the Galactic Interior, 141.
Instrument to Aid Visual Meteor Observation, An, *M. J. Neale*, 353.

J

Jones, A. Vallance (see R.A.S.C. Papers).
Journey via Otjiwarongo (A Trip to the Hoba Meteorite), *J. D. Fernie*, 127.
Jules Verne, *Frederick A. Stebbins*, 20.

K

Kavadas, A. (see Review of Publications).
Keay, Colin S. L., Radar Meteor Observations from Opposite Hemispheres, 358.
Krauze, David J., The Fireball of December 9, 1965—Part I (with Von Del Chamberlain), 184, 390.

L

Leimanis, E. (see Review of Publications).
Lemaître, Georges, 1894–1966, *A. Vibert Douglas*, 77.
Leonard Medal to Dr. C. S. Beals, Award of the, *Peter M. Millman*, 53.
Leonids, The, 89.
Llewellyn, E. J. (see R.A.S.C. Papers).
Locke, J. L., Recent Developments of Radio Astronomy in Canada, 324.

M

MacRae, Donald A. (see Notes from Observatories).
Magnitudes of the Brightest Stars in Globular Clusters, Apparent Visual, *Sidney van den Bergh*, 179.
Mayall, Margaret W. (see Variable Star Notes).
McIntosh, B. A., A Bright Fireball Observed Photographically, by Radar and Visually (with F. R. Park), 25; The Fireball of April 25, 1966, I, Canadian Visual Observations (with J. A. V. Douglas), 159; Path of the Fireball of June 14, 1967, 191.
McKinley, D. W. R., Stars Fall Over Canada (with Peter M. Millman), 277.
Meteor News, *Peter M. Millman*, 89, 151.
Meteor Observation, An Instrument to Aid Visual, *M. J. Neale*, 353.
Meteor Observations from Opposite Hemispheres, Radar, *Colin S. L. Keay*, 358.
Meteorite, A Trip to the Hoba, Journey via Otjiwarongo, *J. D. Fernie*, 127.
Millman, Peter M., Award of the Leonard Medal to Dr. C. S. Beals, 53; Stars Fall Over Canada (with D. W. R. McKinley), 277 (see also Meteor News).

N

National Research Council, reprint no. 9789, *Millman* and *McKinley*, 277; no. 9778, *Covington*, 314; no. 9784, *Locke*, 324.
Neale, M. J., An Instrument to Aid Visual Meteor Observation, 353.
Near Ultraviolet Spectrum from a B Star, The, *Anne B. Underhill*, 9.
Noctilucent Clouds, Recent Advances in the Research on, *Benson Fogle*, 64.
Northcott, Ruth J., The Growth of the R.A.S.C. and its Guiding Mentor C. A. Chant, 218 (see also Review of Publications and Notes).
Note on the Radial Motion of Neutral Hydrogen in the Galactic Interior, A., *K. A. Innanen*, 141.
Notes, 100, 388.
Notes from Observatories, 47, 93, 198, 345, 385.
Nova Delphini 1967, *Thomas Barnes et al.*, 339; *Variable Star Notes*, 351.

O

Observation of the "Fata Morgana" in the Canadian Winter, An, *Ian Halliday*, 74.
Of Stars and the Galaxy, *Alan H. Batten*, 241.

P

Park, F. R., A Bright Fireball Observed Photographically, by Radar and Visually (with B. A. McIntosh), 25.
Path of the Fireball of June 14, 1967, *Bruce A. McIntosh*, 191.
Percy, John R., The Beta Cephei Stars, 117 (see also Review of Publications).

Petrie, R. M. to the Study of Groups of Stars, Some Contributions of, *Helen Sawyer Hogg* (Memorial Lecture), 105.
T Pyxidis, 349.

Q

Quade, Roy (see R.A.S.C. Papers).

R

Radar Meteor Observations from Opposite Hemispheres, *Colin S. L. Keay*, 358.
Radio Astronomy in Canada, Recent Developments of, *J. L. Locke*, 324.
Radio Astronomy in Canada, The Development of Solar Microwave, *A. E. Covington*, 314.
R.A.S.C. Papers, *Tanner*, 41; *Evans, Jones* and *Llewellyn*, 82; *Quade*, 381.
Recent Advances in the Research on Noctilucent Clouds, *Benson Fogle*, 64.
Recent Developments of Radio Astronomy in Canada, *J. L. Locke*, 324.
Redshifts, Large, 146.
Review of Publications:
Alder, B., S. Fernbach, M. Rotenberg, editors, Methods in Computational Physics, Volume 7, *John R. Percy*, 387.
Beer, A. and K. Aa. Strand, editors, Vistas in Astronomy, Volume 8, Aspects of Stellar Evolution, *W. Wehlau*, 44.
Frihagen, J., editor, Electron Density Profiles in Ionosphere and Exosphere, *R. E. Barrington*, 97.
Hess, W. N., D. H. Menzel and J. A. O'Keefe, editors, The Nature of the Lunar Surface, *P. B. Robertson*, 205.
Hodge, Paul W. and Frances W. Wright, The Large Magellanic Cloud, *Sidney van den Bergh*, 347.
Howard, Neale E., The Telescope Handbook and Star Atlas, *Norman Green*, 347.
Kilmister, C. W., Men of Physics—Sir Arthur Eddington, *A. Vibert Douglas*, 200.
Kopal, Z., editor, Advances in Astronomy and Astrophysics, Volume 4, *A. H. Batten*, 154.
Krinov, E. L., Giant Meteorites, *Ian Halliday*, 95.
Mackin, R. J., Jr. and M. Neugebauer, editors, The Solar Wind, *T. R. Hartz*, 203.
Meeus, Jean, Carl C. Grosjean and Willy Vanderleen, Canon of Solar Eclipses, *V. Gaizauskas*, 204.
Moore, Patrick, editor, Yearbook of Astronomy: 1967, *Ian Halliday*, 96.
Pollard, Harry, Mathematical Introduction to Celestial Mechanics, *E. Leimanis*, 45.
Sagan, Carl, Jonathan Norton Leonard and editors of *Life*, Planets, *Ruth J. Northcott*, 45.
Shklovskii, I. S. and Carl Sagan, Intelligent Life in the Universe, *E. G. Woolsey*, 99.
Taylor, Edwin F. and John A. Wheeler, Spacetime Physics, *A. Kavadas*, 98.
Wright, Helen, Explorer of the Universe, *A. E. Covington*, 202.
Robertson, P. B. (see Review of Publications).
Roeder, R. C., Cosmological Problems I, The Time Scale, 369.
Royal Astronomical Society of Canada, Gold Medal (*William Sherwood*), 100; (*Robert H. Chambers*), 388; R. M. Petrie Memorial Lecture (*Hogg*), 105; Minutes of Annual Meeting, 147; General Assembly at Montreal, May 19–21, 147; Session for Papers, 148; National Officers and Council, 149; Chant Medal Award (*R. R. Thompson*), 149; New Service Awards (*Hogg, Millman, Northcott, Simard, Wright*), 150; The Growth of the R.A.S.C. and C. A. Chant (*Northcott*), 218; Observational Activities, 390; C.S.F.C. Award (*Peter Jennings*), 389.

S

Some Contributions of R. M. Petrie to the Study of Groups of Stars, *Helen Sawyer Hogg*, 105.

B Star, The Near Ultraviolet Spectrum from a, *Anne B. Underhill*, 9.
Stars and the Galaxy, Of, *Alan H. Batten*, 241.
Stars Fall Over Canada, *Peter M. Millman* and *D. W. R. McKinley*, 277.
Stars, The Beta Cephei, *John R. Percy*, 117.
Stebbins, Frederick A., Jules Verne (True Prognosticator or Obfuscated Obfuscator), 20.
Stellar Spectra in the Far Ultraviolet, 380.
Study of the Spectrographic Binary 47 Andromedae, A, *J. Murray Fletcher*, 56.
Summary of Drilling at the West Hawk Lake Crater, *Ian Halliday* and *A. A. Griffin*, 1.

T

Tanner, R. W. (see R.A.S.C. Papers).
Tektite Puzzle, The, 86.
Thomson, Malcolm M., Astronomy of Time and Position, 226.
Time: UT, UTc, ET and AT (R.A.S.C. Papers), *R. W. Tanner*, 41.

U

Underhill, Anne B., The Near Ultraviolet Spectrum from a B Star, 9.
UT, UT_c, ET and AT (R.A.S.C. Papers), *R. W. Tanner*, 41.

V

Variable Star Notes, 49, 101, 155, 207, 349, 391.
Verne, Jules, *Frederick A. Stebbins*, 20.
